Application/Control Number: 10/696,791

Art Unit: 3679

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

I. Claims 1-7, drawn to a universal joint, classified in class 464, subclass 130.

II. Claims 8-16, drawn to a method for servicing a staked universal joint, classified

in class 29, subclass 402.07.

III. Claims 17-26, drawn to a service kit for servicing a staked joint, classified in class

29, subclass 283.5.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I and II are related as product and process of use. The inventions can be

shown to be distinct if either or both of the following can be shown: (1) the process for using the

product as claimed can be practiced with another materially different product or (2) the product

as claimed can be used in a materially different process of using that product (MPEP

§ 806.05(h)). In the instant case the product as claimed can be used in a materially different

process of using that product because the universal joint can be used in a method to transmit

torque from a driving source to a driven load.

3. Inventions II and III are related as process and apparatus for its practice. The inventions

are distinct if it can be shown that either: (1) the process as claimed can be practiced by another

materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice

another and materially different process. (MPEP § 806.05(e)). In this case the apparatus as

Page 2

Application/Control Number: 10/696,791 Page 3

Art Unit: 3679

claimed can be used to practice another and materially different process because the service kit can be used to attach a hub to shaft.

- 4. Inventions III and I are related as apparatus and product made. The inventions in this relationship are distinct if either or both of the following can be shown: (1) that the apparatus as claimed is not an obvious apparatus for making the product and the apparatus can be used for making a different product or (2) that the product as claimed can be made by another and materially different apparatus (MPEP § 806.05(g)). In this case the product as claimed can be made by a different apparatus because it can be made with a spacer that hasn't been sized to fit between the retention and replacement members, but instead includes additional elements to fill any space not taken up by the spacer.
- 5. Because these inventions are distinct for the reasons given above and the search required for any one group is not required for any of the other groups, restriction for examination purposes as indicated is proper.
- 6. A telephone call was made to R. Jones on January 25, 2005 to request an oral election to the above restriction requirement, but did not result in an election being made.
- 7. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Application/Control Number: 10/696,791 Page 4

Art Unit: 3679

8. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Specification

9. The abstract of the disclosure is objected to because it begins with a phrase that can be implied. Correction is required. See MPEP § 608.01(b).

Conclusion

10. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Greg Binda whose telephone number is (703) 305-2869. The examiner can normally be reached on M-F 9:30 am to 7:00 pm with alternate Fridays off.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Daniel P. Stodola can be reached on (703) 308-2686. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
